Drive Components, LLC

Drive Components is the authorized representative company in North America for Korea Coupling Co., LTD.

Korea Coupling Company (KCP) is a world-class manufacturer of rigid and flexible shaft couplings, established in 1992. All of their products meet or exceed industry standards and most directly interchange with leading domestic competitors. KCP couplings are in use in a wide range of demanding industries such as coal mining, paper & food industries, petrochemical, steel and cement mills.
